

Connect. Simplify. Optimize

Version 9.6

AssetPlus* GE Healthcare's Asset Management Solution

15 years of evolution to make
you more effective

Specifically developed for the healthcare sector, AssetPlus is a multi-purpose solution combining multiple technologies, with intuitive, easy operation and is designed for all hospital teams: biomedical staff, general technical services, medical technicians, financial services, Information Technology departments and the care teams.

The result of continuous collaboration between GE's development teams and our install base covering all sectors (public, private, single-site, and multiple-site), the AssetPlus solution will assist you in delivering your projects and developing your growth.

GE as a privileged partner within the healthcare sector is **committed to the successful implementation of your projects.**

The fundamentals of AssetPlus* 9.x

CONNECT

Free yourself from limitations and connect your teams. The mobile versions of AssetPlus allow you to access information from your Computerized Maintenance Management System-CMMS from wherever you are working. The Web Module for service requests puts the care departments and technicians in touch with each other for optimum efficiency and helps to reduce turnaround time.

SIMPLIFY

AssetPlus ensures the consistency and quality of the technical information at your facility. Multiple views created on a single database allows individual users to access information relevant to them.

AssetPlus helps you save time by configuring the Web Module to create Service Requests from care departments and through the ability to build interfaces to and from your existing applications to deliver consistent, repeatable updates that simplify your daily life.

OPTIMIZE

You are continually faced with financial challenges at your site. AssetPlus provides you with a clear view enabling you to take better decisions. A statistics module with customizable requests is an integrated part of the system. KPI's and dashboards are within easy reach through a link to various Business Intelligence tools.

Make your data reliable and standardize your key processes thanks to AssetPlus. The product is designed to allow you to continually improve at your own pace.

New features of version 9.6

- **Your asset inventory in a few clicks**
It is now possible to quickly update your permanent inventory! Access this module from your tablet or computer by Wifi, 3G, or 4G.
- **Optimized contracts module**
Track changes in the terms and conditions of all your contracts per asset, and keep a record of all modifications: author, date, and comments.
- **All your work at a single glance**
Use color coding to organize and classify your outstanding workload by due date.
- **"Decontamination"**
Help improve the quality of care and compliance by means of the new "Decontamination" field for your service requests.
- **Profile management**
Simplify your life. With a few clicks, create, delete, edit, and copy user profiles and their associated rights.
